

### Important points regarding placements as Discussed with Bawa sir and CILP

- Always **think twice before applying** for the test. Check the company's CTC, profile, location, eligibility, recruitment process before applying. Once you apply, you have to come for the further recruitment process of that company if your name is on the list for the test, interview or any other round.
- Always provide **correct information** about CGPA, percentage, name. Else incorrect or mismatched information during the verification process by company from the registry can cause a problem for you even after the placement. Do not round off any percentage or CGPA. Always fill it as in the documents. For any query, contact PR of your branch.
- Continue your preparations for the tests and interviews from your side as usually very less time is given for preparation. There may be chances of **psychometric tests** by some companies. Be prepared for that also.
- If any student is having backlogs, it will be considered a backlog until the new result is declared. If a company has mentioned no active backlogs in the eligibility, **apply only if you have cleared the course in the result that has been declared.**
- You must carry your **biodata** during the interview process. You must carry your biodata in the **format** as provided on Thapar website (Link: [http://thapar.edu/upload/files/UG\\_BIO-DATA\\_FORM.pdf](http://thapar.edu/upload/files/UG_BIO-DATA_FORM.pdf)). It can be handwritten or printed but it has to be as per the standardized format as provided. It is recommended that you **upload your biodata form** (UG biodata form) on your google drive link. So as it is always available with you anytime through the internet.
- Carrying of other certificates or CG cards is **not compulsory**. However, if a company demands it, it will be informed prior. So, it is recommended that you should be having the certificates and CG cards **available if required**.
- No student should be wearing flip-flops, capris etc during test or interviews. No one should be carrying mobile phones, calculators or any slips during tests. **I-Card is compulsory during tests. Formals are recommended** for interviews.
- If you are selected for an internship, you will not be allowed in other companies offering internships. But **if you are selected for the internship, you will be allowed to sit for companies offering only placement** or if you are selected for the placement, you will be allowed to sit for companies offering only internship.
- If the results of one company (in which you had applied earlier) are not declared, you are allowed to apply for other company's test. Once the results are declared (i.e you are selected) from any of the companies, you have to inform the CILP and move out from the ongoing interview process of the other companies. **You will be considered selected in the company whose result is declared first, irrespective of the CTC etc.**
- If any student is **selected off-campus** and if that company sends the details to campus for verification, then he/she will be **considered under one student one placement rule**, regardless of the fact whether the company visits the campus for placements/internships or not.
- One **student one placement rule** will be strictly followed as of now.

- Students are advised **not to interact/argue with company officials**. However, you can ask genuine doubts in the company ppt.
